

BITCOIN & SOVEREIGNTY

COMPLETE PRACTICAL GUIDE FOR FAMILIES

Bitcoin isn't just an "investment" — it's a money system people can use for everyday life without banks, borders, or excessive third-party control. For families who want freedom, mobility, and financial security, it can be part of your long-term plan in a way that's accessible, practical, and easy to use.

Financial Freedom.
For Generations.

Borderless
Use Bitcoin
anywhere.

Self-Sovereign
You control
your money.

Secure
Protected by
cryptography.

Generational
Build a legacy
for your kids.

1 HOW EASY IT IS TO USE BITCOIN

Bitcoin is not just for long-term holding — it's also user-friendly for everyday spending, especially in modern economies like Panama, where businesses widely accept Bitcoin.

REAL-WORLD PRACTICAL USE

- ✓ In Panama, many banks accept Bitcoin alongside USD
- ✓ You can use an EFTPOS or debit card linked to Bitcoin
- ✓ You convert small amounts to USD on the fly and spend as normal

Businesses often accept QR codes for Bitcoin payments

Convert Bitcoin to fiat (USD or local currency) via mobile apps

Works anywhere in the world: Bitcoin → fiat in seconds

- ✓ It's not hard — it feels no different than using Apple Pay or a bank card.

2 TOOLS NEW ZEALAND FAMILIES CAN USE

STACKED
(S-T-A-C-K-E-E-D)

- ✓ NZ-friendly app for buying Bitcoin and other crypto
- ✓ Easy mobile interface
- ✓ Great for beginners

stackedinvest.com

moomoo

Moomoo NZ

- ✓ Full brokerage platform for buying stocks and crypto
- ✓ Advanced charting and trading tools

moomoo.com/nz

Sharesies

- ✓ Simple app for stocks and some crypto
- ✓ Excellent for NZ families starting small

sharesies.nz

BlackBull
MARKETS

- ✓ Trade indices, stocks, forex and more
- ✓ Diversified portfolio including Bitcoin via CFDs or direct holdings

blackbullmarkets.com/nz

3 BITCOIN WALLETS — SOFT VS COLD

SOFT WALLETS

(Beginner & Everyday)

Great for newly bought Bitcoin and everyday transactions.

BlueWallet
Simple Bitcoin
wallet app

Sparrow Wallet
More advanced
desktop wallet

COLD WALLETS

(Best for Long-Term Sovereignty)

This is where true self custody happens — it's offline, secure, and gives you control of your Bitcoin.

WALLET	DESCRIPTION	AFFILIATE POTENTIAL
Ledger Nano X	Bluetooth + mobile + strong ecosystem	https://ledger.com
Trezor Model T	Touchscreen + open source	https://trezor.io
Coldcard Mk3	Bitcoin-only leader in sovereignty	https://coldcardwallet.com

WHY HARDWARE WALLETS MATTER

- ✓ No one can freeze or lock your funds
- ✓ You own your Bitcoin even if an exchange fails
- ✓ It stays personal and sovereign

4 PRACTICAL BITCOIN GROWTH EXAMPLE

SCENARIO: WEEKLY BITCOIN CONTRIBUTIONS

Assumptions: Bitcoin growth ~ 8% annually (illustrative) • Contributions compounded weekly

TIME FRAME	\$50 / WEEK	\$100 / WEEK	\$150 / WEEK
1 YEAR	~\$2,605 → ~\$2,800	~\$5,210 → ~\$5,800	~\$7,815 → ~\$8,400
5 YEARS	~\$13,000 → ~\$18,900	~\$26,000 → ~\$37,800	~\$39,000 → ~\$56,700
10 YEARS	~\$52,000 → ~\$94,000	~\$104,000 → ~\$188,000	~\$156,000 → ~\$282,000
15 YEARS	~\$104,000 → ~\$236,000	~\$208,000 → ~\$472,000	~\$312,000 → ~\$708,000

Note: These numbers are illustrative — Bitcoin is volatile, but this table shows how small, consistent buying + growth + compounding can accumulate over time.

FAMILY TAKEAWAY

Even with modest weekly contributions, your children could have \$100k+ in Bitcoin savings by adulthood — a powerful generational strategy.

5 THE 4 PILLARS OF BITCOIN SOVEREIGNTY (ADAPTED FROM THE BITCOIN WAY)

PILLAR 1 BUY & HOLD BITCOIN (SELF-CUSTODY)

- ✓ Purchase Bitcoin on NZ apps like STACKED, Sharesies, or Moomoo
- ✓ Transfer to your own wallet
- ✓ Move to a hardware wallet for long-term storage

If you don't control your keys, you don't truly own your Bitcoin.

PILLAR 2 WALLET SECURITY & SELF-CUSTODY

This is about protecting what you have:

- ✓ Use hardware wallets
- ✓ Secure your seed phrases offline
- ✓ Never share private keys
- ✓ Avoid storing large amounts on exchanges

PILLAR 3 RUNNING A BITCOIN NODE

A Bitcoin node helps you verify transactions yourself — it's a step toward full financial independence.

- ✓ You don't need one to hold Bitcoin, but it deepens your sovereignty
- ✓ Tools like RaspiBlitz or MyNode help families run nodes easily

PILLAR 4 DISASTER RECOVERY & INHERITANCE PLANNING

Owning Bitcoin means planning for:

- ✓ Lost devices
- ✓ Forgotten passwords
- ✓ Passing wealth to children

Best Practices:

- Write your seed phrase on metal, not paper
- Store parts of your seed phrase in multiple safe places
- Create a family inheritance plan
- Consider DIY wills or a secure vault

Ensure your Bitcoin legacy doesn't disappear.

BITCOIN ISN'T JUST MONEY — IT'S FREEDOM

Travel freedom

Mobility

Financial responsibility

A legacy for our kids

Bitcoin can become part of your financial ecosystem — not just as an investment, but as a foundational layer of financial sovereignty.

PRACTICAL TAKEAWAYS FOR FAMILIES

- ✓ Start small if you need to — consistency matters most
- ✓ Use NZ-friendly tools and move to self-custody ASAP
- ✓ Consider weekly buys as a savings strategy for kids
- ✓ Protect your keys, plan inheritance, and use hardware wallets
- ✓ Bitcoin works worldwide — spend it, hold it, grow it
