Quantum Healing Hypnosis Technique

The Unbordered Family

What it is

- QHHT is a gentle modality for accessing inner wisdom, clarity, insight, and healing through a relaxed hypnotic state.
- It is not about predicting the future or handing your authority to someone else. It helps you remember the answers within.

Session Flow

- Pre-session intention: prepare questions or themes.
- Safe space creation: calm, private, supportive environment.
- The session: connect with inner guidance and receive insight.
- Post-session integration: debrief, journal, listen back if recorded, and apply the insights.
- Ongoing application: use insights as tools for aligned daily life.

Important

- QHHT is complementary and not a substitute for medical, legal, financial, or mental health care.
- Sessions should be confidential, respectful, non-judgmental, and consent-led.
- For children and loved ones, use age-appropriate support and professional guidance where needed.
